

# Empower Your Industry with i4Twins

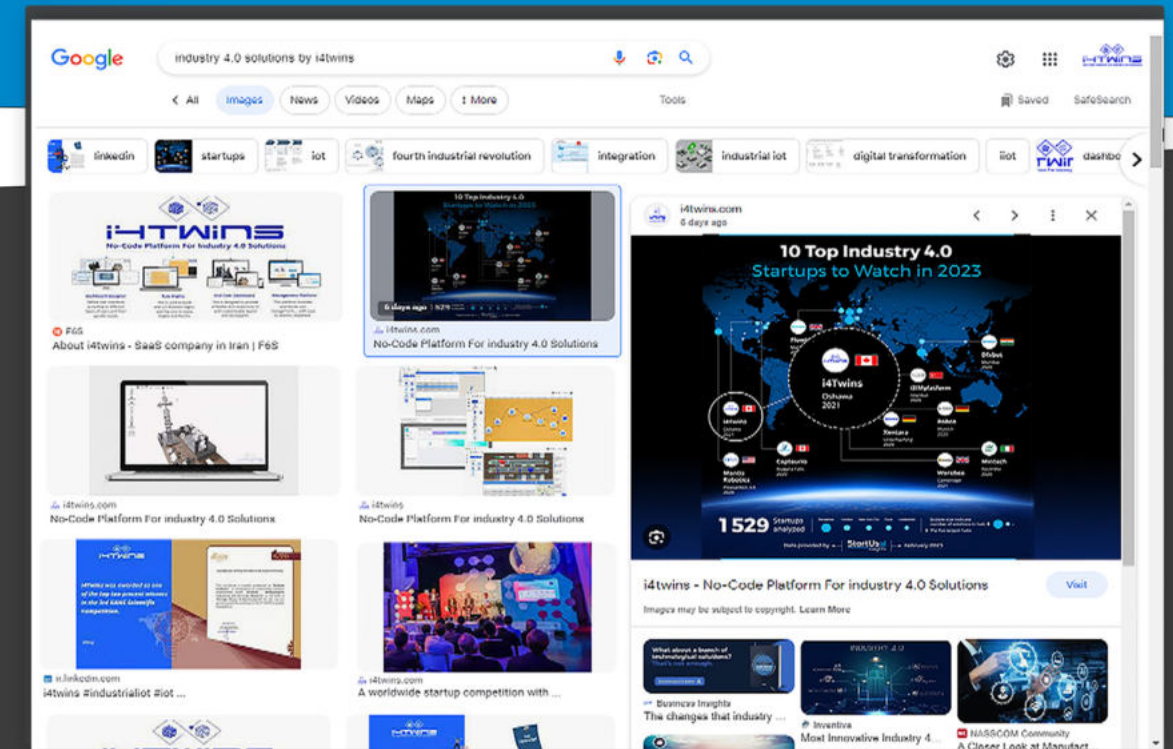

**i4TWINS**  
No-Code Platform For Industry 4.0 Solutions

# About us

At i4Twins, we're driven by a commitment to make digital transformation accessible and practical. Our platform offers the flexibility, reliability, and ease you need to build intricate connected solutions securely and swiftly. With i4Twins, you gain powerful data handling, aggregation, visualization, and testing capabilities, transforming vast sensor data into actionable insights. Plus, our intuitive drag-and-drop tool lets you design projects, monitor live and historical data, and generate reports without any programming knowledge.

Our services offer everything you need to create industrial and non-industrial dashboards effortlessly. i4Twins Designing Portal integrates a rich component library, easy data-binding, drawing tools, scripting capabilities, all within a unified development environment.

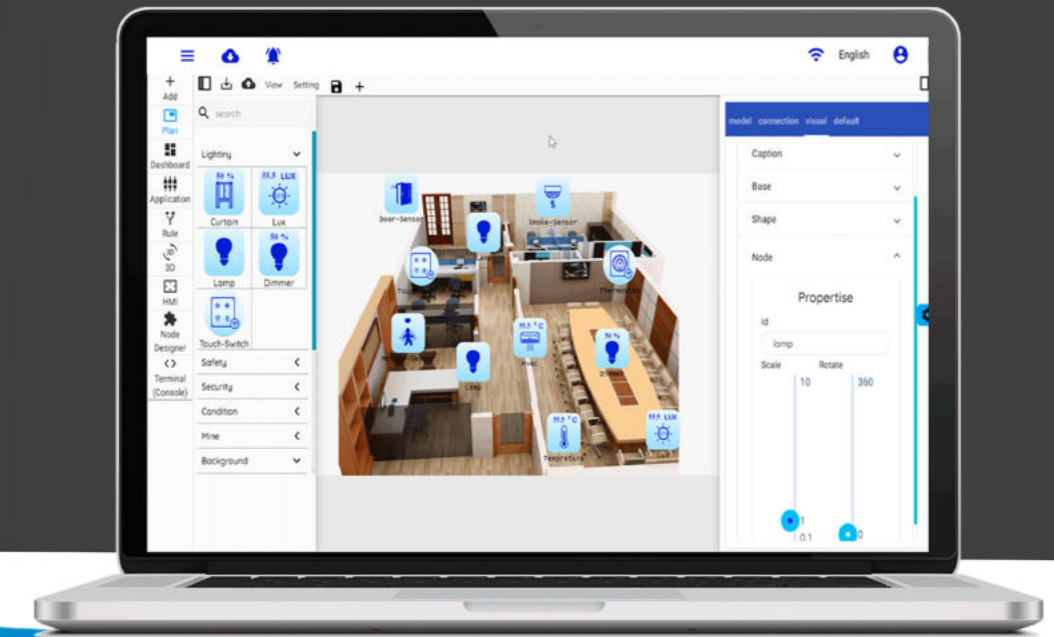

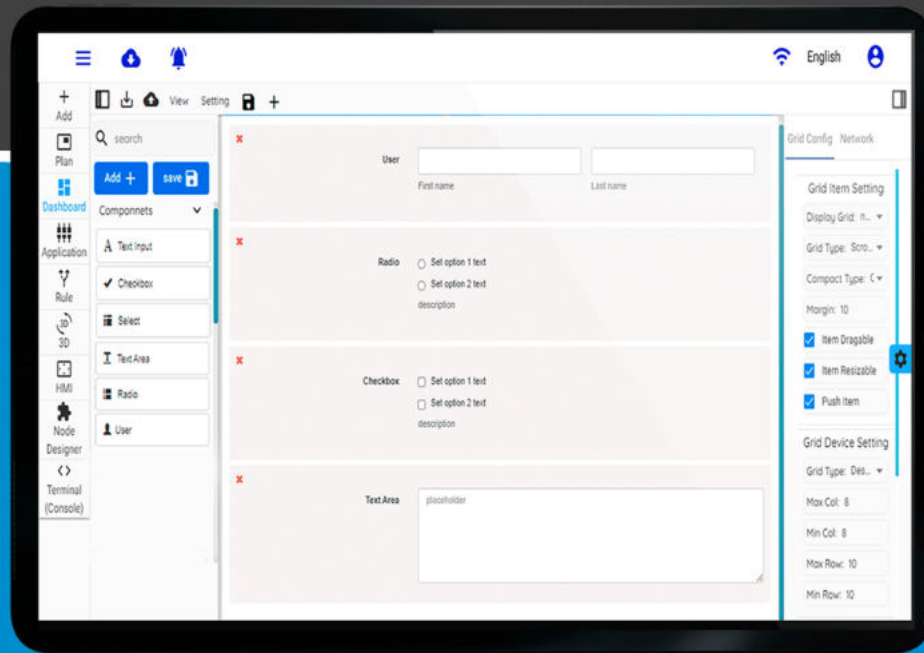

i4Twins is your partner in Industry 4.0, simplifying complexity and accelerating digital transformation. With our comprehensive suite of modules, you can effortlessly design, monitor, and control your industrial processes. Discover why i4Twins is your gateway to the future of industrial IoT.

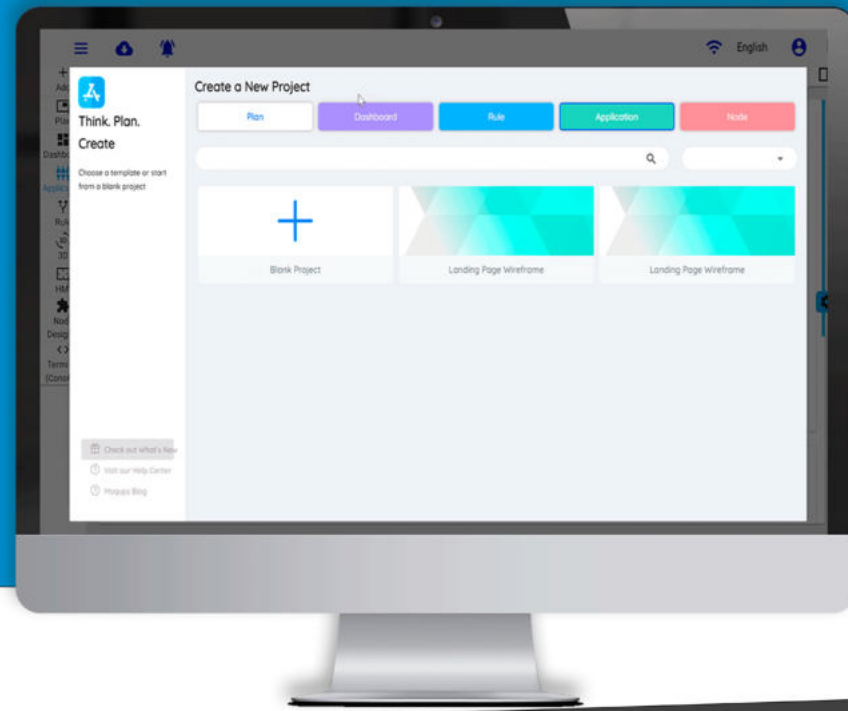

# Form Builder

Create future-proof forms with minimal coding using i4Twins Form Builder. From basic electronic forms to complex business applications, layout controls, and fields through drag-and-drop. Connect to data sources seamlessly.

# Plan Designer

Realize unique interfaces and integrate with IoT devices with i4Twins Plan Designer. Its drag-and-drop tools allow you to impress clients with stunning visualizations.

## Project Designer

Design end-user dashboards easily with i4Twins Project Designer. Share them via simple links even without requiring registration. Configure menus, language selectors, alignments, and data bindings effortlessly.

## Monitoring Dashboard

i4Twins Monitoring Dashboard empowers you to create stunning, no-code dashboards. Utilize drag-and-drop widgets in a grid-based designer. Customize configurations through an intuitive web interface.

# SCADA Designer

i4Twins SCADA Designer is a web-based SCADA platform that empowers you to monitor and control your SCADA systems from anywhere in the world. Our SCADA Designer is crafted for user-friendliness, saving you valuable time and effort when setting up your projects.

It comes equipped with a built-in native web server that supports HTML and CSS, eliminating the need for additional technical expertise. With i4Twins SCADA Designer, the creative freedom is yours - you can design and configure SCADA/HMI scenes exactly the way you envision them.

Unlike some traditional SCADA systems that rely on raster images, which may become pixelated when enlarged, i4Twins SCADA Designer utilizes SVG for graphics, ensuring scalability and stunning visuals regardless of resolution or zoom level
